Secure, reliable, intelligent, high density, managed switching for your growing business

Growing businesses require cost effective, networking solutions that can scale with ever changing business needs. The Linksys SRW248G4 Switch with WebView brings a whole new level of intelligence and security to the network infrastructure. The 48 10/100 Mbps ports enable you to consolidate your network from several smaller switches/hubs to a single, managed switch. The optional gigabit optical interfaces allow you to expand the network as your business grows.

Network security is a top priority in any size business. Most business data networks, large and small, are insecure. Unauthorized access to the network and mission critical data is a constant concern. The SRW248G4 is able to secure the network through 802.1X port authentication and MAC-based filtering. 802.1X requires clients to authenticate themselves before the port will pass data.

Businesses are recognizing the benefits of doing Voice over IP (VoIP) and are quickly migrating their voice services to IP based platforms, requiring their local area networks to support both voice and data applications. In unmanaged IP networks, bursty data sessions can disrupt voice packet delivery, causing poor voice quality. With the enhanced QoS and traffic management features in the SRW248G4, voice data can be prioritized, ensuring clear and reliable voice communications.

Enabling the SRW248G4 advanced features further secures the integrity of your network. The WebView interface provides an intuitive, secure management interface enabling you to better utilize the comprehensive feature-set of the switch, resulting in a better optimized, more secure network.

Simplified, web based user management for more intelligent networking

Quad gigabit uplinks for increased bandwidth and redundancy

802.1X port authentication and MAC address filtering brings network security down to the switch port level

QoS enables the network to be optimized for your networked applications, including voice, video and data storage
