

# iRig Phone Guitar Interface

## Detailed Product Description

With iRig, you can plug your guitar into your Phone/Pod touch/Pad and jam anywhere with world class guitar and bass tone. Jam anywhere with world class tone in the palm of your hand!

- Complete interface and software solution for your musical creativity
- Easy-to-use instrument interface adapter and guitar/bass tone mobile software
- Plug your guitar right into your iPhone or Ipad and jam anywhere

We knew it was coming. Eventually, someone would come up with an awesome way for us to connect our electric guitars and basses right into our iPhones. (The iPhone to brain connection is still in development.) When we found the iRig, we knew our search was over

Phone Interface

The AmpliTube iRig is a combination of an easy-to-use instrument interface adapter and guitar and bass tone mobile software. With AmpliTube iRig, you can plug your guitar into your Phone/ Pad notebook computer and jam anywhere with world class guitar and bass tone right in the palm of your hand. Simply plug the iRig interface into your mobile device, plug your instrument into the appropriate input jack, plug in your headphones, amp or powered speakers, download AmpliTube Free for Phone or for Pad Notebook, and start rocking!

You'll have at your fingertips the sound and control for up to 4 recombinaable simultaneous stompbox effects + amplifier + cabinet + microphone just like a traditional guitar or bass stage rig! Add amps and effects as you need them - you can expand your rig with up to 11 stomps, 5 amps, 5 cabinets and 2 microphones in the AmpliTube iRig app custom shop.

The iRig is the ideal companion not only to the mobile AmpliTube app, but also works with any other recording, processing or tuning app. Plus, you can also use the iRig with line level signal sources such as synthesizers, keyboards or mixers
